

Cookie Policy

What is Cookie?

Cookie is a small text file containing parts of information saved in the browser you use on any device (such as your computer, smartphone or tablet). The server is able to read this cookie later on, much like memory of the webpage.

- Cookie allows us to collect and store your following information automatically.
- Internet domain and IP address.
- Your Internet browser and operating system.
- Date and time of your visit to the website.
- Address of other websites connecting to ours, and The page you visit to access and leave our website, along with content on the page you visit and duration you stay on the webpage.

Objectives for cookie and data storage

We use cookie and data storage for following objectives:

- To collect anonymous statistics and understand the use behavior of our website visitors, so we can improve our content and structure to suit the users' needs.
- To record use or parts of information the user had entered in the past.

Cookie setting

You can partly or wholly block cookie functions in your browser setting. However, blocking all cookies (including essential ones), may lead you not being able to access parts of or the entire website. When you desire to revoke the cookie authorization, you can set your browser to delete cookies from each of your browser.
